

who is gfan & what we do

- Network of health advocates created in 2012
- 765 members as of 2021
- Small secretariat team based in Canada and Fiji

- Bi-weekly GFAN calls; Ask & Complementary Pieces; Monthly Round-ups
- Regular social media engagement and website updates
- maintain network of members at global and regional level
- Support to GFAN Speakers; create and monitor spaces in calls/listserv/at meetings
- GFAN Strategy Meeting and replenishment focused conversations

replenishment key donors

- **G7 members:**
 - **UK:** very challenging
 - **Canada:** Opportunity for momentum
 - **France:** Limited visibility
 - **Germany:** G7 Presidency
- **Private sector:** key to reaching \$18bn
- For each: specific messaging to show alignment between their priorities and the Global Fund's

replenishment key messages

- Investments in the Global Fund will achieve **significant and important gains**
- **18bn is suited to fight yesterdays' battles.** It will not be enough to get us to our 2030 goals. It is the bare minimum needed to implement the Global Fund new strategy.
- **Inflation** is further eating into what can be achieved with \$18billion
- The Investment Case projects and assumes an **irresponsible gap**
- **DRM figures are optimistic**, especially in light of economic consequences of war in Ukraine and post covid debt burdens

replenishment: opportunities & challenges

challenges

- Highest ask ever, highest increase from previous replenishment
- Competing priorities: Ukraine, COVID-19, PPPR, Inflation, Gavi replenishment
- Context: COVID-19 recession + inflation = ODA cuts / donor distrust towards multilateral mechanisms
- Condensed timeline; lack of momentum
- Distracted replenishment host

opportunities

- Secured US pledge aligned with target
- Lack of early pledge: nothing is definitive yet
- Global focus on health

7th replenishment: gfan key moments & resources

- Nov 21 - Fully Fund the Global Fund Report:
 - CS Ask and key messages for the campaign
- Feb 22 – Investment Case:
 - 7 asks for the 7th Replenishment toolkit
