The Global Fund: good practice in grant governance

01 **Vibrant community constituency representation**

Community voices shape priorities through representatives and dialogue

02 **A national/Government led grants applications**

Coordinates and endorse grants, and implementing partners

03 **A vibrant community constituency in Governance**

Oversee performance and changes/transitions

Public participation in Kenyan budgets

National government

Sector hearings and Budget Policy Statement

Parliamentary scrutiny of budget estimates

A practical ask: finance TB commodities and national laboratory capacity

County government

Annual Development Plan and County Fiscal Strategy Paper

County Assembly budget hearings

A practical ask: fund clinic staff, outreach transport and referral follow-up

The test: a community proposal becomes an allocation, expenditure and service

A TB care pathway: who funds which stage?

Stage of care	Partner support to agree on the budget	Government contribution to align
Finding people with symptoms	Community outreach and referral through PR / SR budgets	County teams and community health structures
Diagnosis and treatment	Approved commodities for screening, diagnosis and treatment	National programmes and county facilities / staff
Treatment follow-up	Approved community support and tracing	County supervision and routine follow-up
Accountability	Nationally aligned programme performance tracking and community-led monitoring platforms	Public reporting and budget oversight

Continuity when a grant-funded activity ends

01 **Transparent programme costs for transition planning**

Share activity costs and funding gaps with government early

02 **Alignment with government-approved rates**

Use applicable public-sector rates to support an affordable handover

03 **Partner funding timed to government budget cycles**

Plan the handover before budgets are final and confirm funding dates

What the compact can make explicit

01 **Who decides and how communities influence choices**

Use the GF KCM lessons and existing national and county participation channels

02 **Who pays for each service and participation stage (transparency)**

Name the budget, funder, implementing body and release timetable

03 **Who reports back and closes financing gaps**

Review allocations, expenditure and community feedback together

Thank you

A person screened referred from the community should reach diagnosis, treatment and follow-up with every stage funded
